Important: Due to the high level of interest expected, we cannot guarantee that all entries will be accepted. Artwork and images that meet the following requirements will be highly favoured.

SELECTING SUITBALE IMAGES

- Photos that are a **landscape orientation** is highly preferred and work best for the projection space.
- Good **tonal contrast and saturation** is also important, images or artwork that are too subtle can appear flat once projected on the silos.
- Your images should be **clear and crisp** and high in clarity.
- If possible, choose artwork that has a **lighter foreground, against a darker background**.
- Avoid white or plain coloured backgrounds, to prevent the appearance of the concrete surface showing through.
